

Systemch ERP

Trading & Distribution Management System

Systemch TDMS is an integrated web based ERP exclusively designed for efficient Trading & Distribution Management. Being a perfect fit for any trader, it will redefine your business radically by guiding you to take the right decisions. With the right blend of latest technology and best practices, it gains keen insight into your daily business making your profitability soar.

Salient Features

Anywhere Anydevice ERP

Stay connected with your business from anywhere anytime and thru' any device (Laptop, Tab or Mobile) thru' a simple data connection. Do or watch any transaction on the go, all at an incredible speed.

Analytics & Dashboards

Analysis and presentation of data as rich, vibrant, interactive and lively graphical dashboards that helps you interpret your business to take quick and easy decisions.

SMS/eMail alerts

Send critical information and alerts over SMS and email to any stake-holder of the business and making them to participate. Helps you act pro-actively before things become too late.

IoT : Being the buzzword of IT industry today, IoT (Internet of Things) integrates with your business environment seamlessly to form the ultimate automation. Data fetching from your machines, capturing fabric weight from scales, attendance data from your bio-metric machines are classical examples. It ensures accuracy and optimizes time and resources.

Mobile Apps

Get those exclusive functions optimized in the form of mobile Apps that synchronizes with your ERP data in a seamless manner.

Paperles Office

Store images of your style / products, vendor invoices, key shipment documents, employee images and documents for instant reference and audits. These documents will traverse thru' the entire work-flow making your computing easy and exciting.

Tally Integration

Live integration with Tally. ERP9 for posting your Purchases & payments, sales & receipts, job order invoices, debit & credit notes and closing stock. Replaces manual replication with accurate and timely data making your P&L and Balance Sheet upto date.
