Now at your finger tips.

Systech ERP - TEXTILE MANAGEMENT SYSTEM

The New age ERP for the discerning Customer ...

Systech ERP - TEXTILE MANAGEMENT SYSTEM

Systech TMS is an ERP exclusively developed to meet the demanding needs of the Textile Business from its rich legacy parent product that is proven in several other industries. Systech TMS optimizes your resources, offers you total visibility and control across your business thereby helping you to make quick and corrective decisions in real-time.

Systech TMS integrates everything right from Buyer Enquiry to Production Planning and Purchase to Inventory and Sales to Finance till you receive your last penny incentive, all in a holistic manner. Systech ERP offers cutting edge technology that transforms the way you do your business into a pleasurable everyday journey.

So from now on, you can focus on your core business leaving everything else to Systech TMS.

Paperless Office

Store images of your style/products, vendor invoices, key shipment documents, employee images and documents for instant reference and audits. These documents will traverse thru' the entire work-flow making your computing easy and exciting.

SMS / eMail alerts

Send critical information and alerts over SMS and email to any stake-holder of the business and making them to participate. Helps you act pro-actively before things become too late.

IoT

IoT : Being the buzzword of IT industry today, IoT (Internet of Things) integrates with your business environment seamlessly to form the ultimate automation. Data fetching from your machines, capturing fabric weight from scales, attendance data from your bio-metric machines are classical examples. It ensures accuracy and optimizes time and resources.

Anywhere Anydevice ERP

Stay Connected with your business from anywhere anytime and thru' any device (Laptop,Tab or mobile) thru' a simple data connection. Do and watch transactions on the go, all at an incredible speed.

Mobile Apps

Get those exclusive functions optimized in the form of Mobile Apps that synchronizes with your ERP data in a seamless manner.

Analytics & Dashboards

Analysis and presentation of data as rich, vibrant, interactive and lively graphical dashboards that helps you interpret your business to take quick and easy decisions.

Tally Integration

Live integration with Tally.ERP9 for posting your purchases & payments, sales & receipts, job order invoices, debit & credit notes and closing stock. Replaces manual replication with accurate and timely data making your P&L and Balance Sheet upto date.
